PURGED ARTICLE| Where is Timothy Cunningham's Whistleblower Report on Coronavirus?

This article was PURGED by UNKNOWN ACTORS along with my website's SQL file. #IC3Filed The article was found, and I think it's time to talk about Timothy Cunningham. A Naval Officer that drowns in a river faced down 3 inches deep. How many sailors do you know can't swim? HERE IS THE [ARCHIVE](#), initially published on **March 13, 2020**.

Who Is Timothy Cunningham? He worked for the CDC, but he was a special CDC officer. He was an Epidemic Intelligence Service officer. What's that? Epidemic Intelligence Service Officers deal with diseases and biowarfare. He was on the team for H1N1, Ebola, and the Zika virus. He mysteriously died when THEY decided to deploy their chaos.

According to exclusive sources, he was startled with findings over the years regarding how flu vaccines amplify the side effects of viral infections rather than inoculate patients effectively.

In December of 2017, [Cunningham](#) was assigned to what was at the time a new project unofficially known as "Shogun." According to our exclusive sources, testing and manipulation of the SARS strand were being used against a new drug that could eliminate a virus to infect your cells. It's important to understand HOW viruses function to understand WHAT Timothy Cunningham's whistleblower report had.

Viral infections, in other words, are your cells being hijacked to spew out more viruses. The cells in your body are used as a host to replicate more viral cells until none of your cells are left. Viruses are like stupid parasites; they keep going until all life is eradicated. Unless they can mutate to a point where they can metabolize without a host, they will die too. In essence, they use your cells to increase but don't have a plan when they are "done" with you.

Until now, most medications like Tamiflu focus on disabling viruses to "explode." When a virus hijacks a cell, it replicates until the cell explodes (lysis). Tamiflu doesn't allow the lytic cycle to be completed; therefore, no other cells are infected by the newly created viruses.

WHAT DID TIMOTHY CUNNINGHAM FIND OUT?

It turns out that the Chinese did what they always do. They stole (were given) proprietary information from the CDC and labs at Harvard to kickstart their new research, funded by the **Bill and Melinda Gates** Foundation. This new research is two-prong.

- Designing the SARS virus to target specific cells that control fertility in males. Almost like chemical castration.
- Designing the SARS virus to infect and insert “protein code” with retroviral applications that respond to SQUARE WAVES.

In 2015, the Chinese successfully came upon research that found a novel method to control viral infections. The study focused on inducing apoptosis of cells (which self-destruct) when the initiation of viral material production is detected. The lab in Wuhan, China, is where the Chinese investigate and create subtle BioWarfare agents. For every bioweapon you make, an “antidote” must be created. In this case, they took the antidote (so did the CDC) and reverse-engineered different weapons.

Cunningham discovered that specific individuals in the U.S. were working on information they received from the Chinese regarding weaponizing SARS – with high specificity in virulence targeting particular genetic code and enzyme packets for transcription. In essence, the new virus would mimic that of HIV. A “smart” virus that could replicate all ligands of target cells not to be detected by innate immune cells and therefore “lie in waiting.”

In January 2018, the CDC's EID (Epidemic Intel Division) had decided to test this in specific COHORTS.

WHAT IS A SPECIFIC COHORT?

Have you noticed how all your vaccines and flu shots have bar codes? They are scanned multiple times, etc. Well, with the information they gather from clinics, hospitals, and pharmacies via your insurance (thanks to Obamacare), the CDC has a complete picture of almost everyone's health. In addition, your DNA... is stored at your local hospital or clinic every time you give blood, not convinced? Read the fine print in your “CONSENT TO TREAT” that you are compelled to sign every time you visit. According to federal guidelines, clearly states they can hold all audio, pics, video, and DNA for up to 7 years and SHARE it. (Again, thanks, Obamacare). What are the federal guidelines? Obamacare made it so any insurance company and any private company they contract with, like Global Strategies Group, Lockheed, Google, Amazon, etc. – including car insurance, can have access to it. Don't believe it – READ the Affordable Care Act.

With that in mind, a cohort is a selected group of individuals or target demographic that you test drugs on.

HERE IS A PURELY HYPOTHETICAL EXAMPLE:

The Cleveland Clinic has various groups of primary care. Hypothetically speaking, if the target group were “Caucasian males aged 35-55 that have ABC genetic type, found in specific European groups,” then you would find which clinic patients have that fit that profile. Let's assume that two offices provide a 15% test pool for that target group because the clinics are present in neighborhoods with many German and Polish migrants. The remaining 85% are statistical data or controls that can provide direction for future research.

Once your cohort sample is identified, you usually deploy the drug you want to test. Hypothetically speaking, the flu vaccines or PNEUMONIA vaccines that people over 50 offer every ten years can be your MEAN to test your drug or bioweapon covertly.

The above scenario is hypothetical but rings true because, in Spring, people are testing positive across the nation for Influenza A and B rapidly. Those were vaccines deployed in 2018 and 2019, which is very

telling.

We asked our exclusive source about that, and the response was:

Influenza A and B expression could indicate that they contracted COVID-19 but expressed the virus they were supposed to be inoculated with. In other words, COVID-19 exposure may activate the "dead" virus, hypothetically speaking.

Former EID Officer

WHAT DID TIMOTHY CUNNINGHAM ALLEGEDLY KNOW?

An omitted fact preceding Cunningham's disappearance is his recent meeting with certain people from Japan. He provided data that confirmed that the Chinese and certain entities met in McLean, Virginia, discussed.

Before his disappearance and "suicide," he visited ALL his close confidants, terrified as he was bold enough to leave a paper trail by filing a whistleblower report. He filed it on a Monday, and within 48 hours, he knew that his identity was not protected. He attempted to reach the President of the United States. General Kelly was not very happy about that from what our sources say, and in his panic seemed erratic. Tim didn't sound right. He told people to delete his phone number and was on the run because people would kill him. The FBI counterintelligence division, the same one Peter Strzok worked for, knows that – there are emails.

MISSING

Timothy Cunningham

Atlanta, GA
Age: 35 Years

Height: 5' 11"
Weight: 230 lbs

Hair: Black
Eyes: Dark Brown

Timothy Cunningham has been unaccounted for since Monday afternoon, February 12, 2018. He was last seen at his workplace in Chamblee, GA. He returned to his home in the Bolton neighborhood of Atlanta, GA.

If you have any information about Tim's disappearance or his whereabouts, please call 911.

Two weeks after his disappearance, he was found dead in a river. They claimed it was a result of suicide. A sailor died of drowning? Even as an NCO, you go through the swim test and swim class.

His knowledge? Japan created an all-encompassed cure, and pharmaceutical companies were seeking ways around it.

DOES PRESIDENT DONALD J. TRUMP KNOW?

Does President Trump know that while all of us are getting VACCINATED, Shionogi & Co., a Japanese company from Japan, has invented a drug that can eradicate ANY VIRUS that invades the human body?

Imagine if the United States of America people knew that their annual flu vaccine was unnecessary every year and that all their Congresspersons and Senators have HUGE pharmaceutical portfolios. Imagine if they also knew that the hospital and doctors were rewarded for all the vaccines they provided, even though they were unnecessary because a medication can stop any virus.

Hypothetically speaking, you can't come out and say something like that- ever-you would be christened the King of Tin Foil hats. Though people got sick and an "epidemic" happened to draw attention to the "flu," it would be appropriate... hypothetically speaking.

The complaints many have is that President Trump is NOT distributing CDC-derived testing kits. Instead, he has requested all labs and hospitals nationwide to create their own. Why? No centralization of information. Publicly available information promotes transparency. It's evident that the EID is foaming at the mouth right now, and the Deep State is terrified.

The amplification of the "flu" and the quarantines – self or government-imposed – create a hyper-focused public that demands answers.

So many rumors and hypotheses – but one thing can shed some light. Shionogi & Co. used their ANTI-HIV medications to create their FLU TERMINATOR. The medication disallows the RNA/DNA of the virus to be replicated by the HUMAN nucleus. That means it is a generic drug that disables "unzipping proteins" necessary for transcription. If the cells can't be hijacked, then the virus dies in the intercellular space it occupies since it lacks a host.

Why are we getting vaccinated against viruses when we can terminate the ability to have them hijacked in the first place?

Timothy Cunningham said that to his close friend before he disappeared

The *Kansas City Star* had the most abundant information surrounding the missing EID Officer:

The Cunninghams have told police about a "worrisome" phone call and text messages from him on Feb. 11, the details of which they shared with police but are keeping private from others.

Kansas City Star

If what our sources tell us is accurate, and if Japan has a blanket drug with this virus being designed to evade it, the President of the United States would definitely know. Time for Mr. Cunningham's whistleblower report to be leaked.

JUST HAD A GREAT CONVERSATION WITH PRIME MINISTER ABE OF JAPAN. I TOLD HIM THAT THE JUST COMPLETED OLYMPIC VENUE IS MAGNIFICENT. HE HAS DONE AN INCREDIBLE JOB, ONE THAT WILL MAKE HIM VERY PROUD. GOOD THINGS WILL HAPPEN FOR JAPAN AND THEIR GREAT PRIME MINISTER. LOTS OF OPTIONS!

— DONALD J. TRUMP (@REALDONALDTRUMP) MARCH 13, 2020

The mass hysteria and weaponization of a flu coup by the mainstream media (MSM) were done to make the case that the president is incompetent and tank the market. "Never let a good crisis go to waste" is a saying the Deep State loves, and one that seems pretty accurate in this case.

They are buying time to avoid the inevitable.
