## Joe Biden Following UN Agenda 2030 Climate Plan to Reduce Meat Consumption by 90%

May 7, 2021 Ice Age Farmer 3

Biden’s new climate plan targets for 2030 come directly from the United Nations and include reducing red meat consumption by 90%, allowing only 4 pounds per year, and decreasing all animal source foods & products by 50%. Christian shares the latest global developments in the race to zero carbon emissions: switching to electric cars at a cost of \$55,000, replacing wood stoves, oil and gas heaters with \$5,700 electric heat pumps, monitoring food waste, banning the shipping of livestock in New Zealand as animal agriculture is being phased out, and more. The race to enslave humanity is on.

“Since 1960, 25 percent of the forests of Central America have been cleared for cattle. Once cleared, the poor soils will support grazing for a few years; then the grazers must move on. Shrubs take over the abandoned pasture, but the forest does not return “With 1.5 billion cows on the globe, planet earth must deal with trillions of pounds/gallons of manure waste, water waste to feed the animals. Combined with the amount of fuel, arable land and water to grow the corn and grain encompassed in filling the stomachs of beef cows .....” —America’s Overpopulation Predicament: Blindsiding Future Generations... Over my dead body! these communists(Biden included) are trying to get us to eat bugs, but it ain’t gonna happen. try to tell the average cattle rancher in Texas or average Texan, who LOVES their beef, to their face they need to consider consuming bugs and see what happens!!

My opinion is that the red states should definitely DO anything INCLUDING nullification to stop any unconstitutional actions taken by this tyrannical administration.
