F1: that it [might be an issue so I wanna know where it is and perhaps even what it is.]

R1: **Slayed, it owned a V spy hurt. May say it, area won in a war. Sue shit laid bam.**

### **Interpretation:**

- Connected to the issue and where and what it is that may present in December 2023 is some group or other body who owned a victorious spy that's connected to being hurt and slayed connected to an area that won in a war connected to blaming bad shit connected to laying down a bam, or impact in some way.

The "Scare New Jersey" Reversal includes a meteor in the RS. It's the first one in this show- Start about 14 mins in to cut to the chase- **16:10** is where the Interpretation starts for the reversal.

R2: **Ease in notch. Moe siege urge the-great-spy-make-war server in the end the Ai-it-sound-in-the-whirl for weep.**

### **Interpretation:**

-Connected to trying to see connected to the scare New Jersey reversal is carefully easing in the tallying up of something connected to the cutting down of the urge for a military siege connected to where the era of the great spy creating war is being served from, connected to ending Ai and sonar manifesting the energy of suffering into physical reality (sonar likely refers to the weaponized sonar-network).
